

**FOREVER
BREATHE™
SPECIFICATION**
PERFECTING AIR QUALITY

VISIT OUR DEMONSTRATION HOME

The new standard in high-performance sustainable building.

You can breathe easy when you build your new home to the Foreverbreathe Specification.

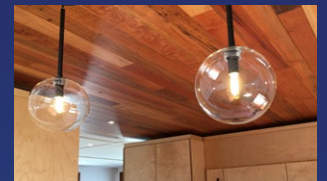

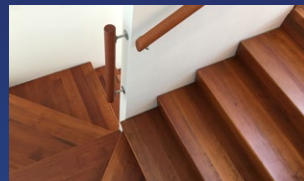

Featuring a sophisticated combination of healthy, sustainable materials and the cutting-edge Foreverbreathe Wall System to manage air exchanges, humidity, and air quality.

In fact the air quality is so good, the Foreverbreathe Wall System is approved by the Asthma and Respiratory Foundation NZ's Sensitive Choice® program.

The Foreverbreathe Specification delivers exceptional energy efficiency and comfort without the reliance on costly whole-home mechanical ventilation systems.

The benefits don't stop there. All environmental aspects are covered, including down-stream waste management.

For a healthy, sustainable home for you and your family, choose the Foreverbreathe Specification.

Take a step towards your sustainable home.

The Foreverbreathe Specification can be introduced at the design phase of your building project and include your builder, architect, or designer.

Let us show you how easily the Foreverbreathe Specification fits into your plans.
